SUMMARY

Information Technology student with hands-on project work in backend development using Node.js and Python. Implemented RESTful APIs, user authentication, and database-driven features across academic and personal projects. Strong foundation in data structures, logic-based systems, and problem solving.

SKILLS

- ❖ **Backend & Programming:** Python, Java, JavaScript, Node.js, Express.js
- ❖ **Web & Databases:** HTML5, CSS, MongoDB
- ❖ **Tools & Platforms:** Git, GitHub, Text Processing (Python), Azure Fundamentals (AZ-900 – Coursework)

EDUCATION

- ❖ Information Technology | GHRCEM, Pune CGPA: 8.13 (As of June 2025)
- ❖ XII | Nutan Vidyalaya, Malkapur Year: 2023

ACADEMIC PROJECTS

Python-Based Resume Content Analysis and Builder System (March 2025 – Present)

Role: Python Developer (Personal Project)

- Designed modular text-processing pipeline.
- Handled unstructured input and generated structured outputs.
- Focused on logic validation and edge cases

WanderLust - Property Listing and Booking Web Application (Airbnb-Inspired) (January 2025 – Present)

Role: Full Stack Developer

- Implemented role-based access control.
- Designed MongoDB schemas for scalable data handling.
- Built REST APIs for listings and user actions.

ACHIEVEMENTS / HOBBIES

- Microsoft Azure Fundamentals (AZ-900) – Coursework / Certification Preparation
- Poster Designer for college events using Canva.
- Experience working independently on structured, accuracy-focused technical tasks.
