SUMMARY

Information Technology student with hands-on experience in backend development using Node.js, Express.js, and Python. Built and deployed production-grade RESTful APIs, implemented JWT authentication, and designed MongoDB schemas across academic and personal projects. Quick learner with a structured approach to problem-solving — available on weekends for impact-driven work.

EDUCATION

GHRCEM, Pune

Bachelor of Engineering – Information Technology

- CGPA: 8.13 (As of June 2025)

Pune, Maharashtra

Expected June 2026

Nutan Vidyalaya, Malkapur

Higher Secondary Certificate (XII)

Malkapur, Maharashtra

Year: 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, Java

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, bcrypt

Databases: MongoDB, MongoDB Atlas

Web: HTML5, CSS

Tools & Platforms: Git, GitHub, Render (Deployment), Postman, Canva

Cloud: Microsoft Azure Fundamentals (AZ-900 – Coursework)

Soft Skills: Independent learner, structured problem solver, weekend availability, remote collaboration

PROJECTS

SkillMatch – Skill-Based Job Portal Backend | *Node.js, Express.js, MongoDB, JWT*

Jan 2025 – Present

- Engineered RESTful API with 20+ endpoints enabling skill-first hiring by calculating 0–100% candidate-job compatibility scores, eliminating CGPA-based bias in recruitment.
- Architected MongoDB database with 5 interconnected collections (User, Student, Company, Job, Application) using referenced relationships and unique indexes for data integrity.
- Implemented JWT authentication with role-based middleware controlling student/company access to protected routes, securing 15+ endpoints with bcrypt password hashing.
- Deployed production backend on Render with MongoDB Atlas, achieving <500ms API response times and 99%+ uptime over a 30-day period.
- Built automated application system preventing duplicate submissions and tracking 3 status states (applied/shortlisted/rejected) with separate company and student dashboards.
- Live: skillmatch-backend.onrender.com | GitHub: github.com/alpeshborekar/skillmatch-backend

WanderLust – Property Listing and Booking Web App (Airbnb-Inspired) | *Node.js, Express.js, MongoDB*

- Implemented role-based access control for multi-user system supporting hosts and guests.
- Designed MongoDB schemas with scalable data modeling for listings, bookings, and user data.
- Built REST APIs for property listings, user actions, and booking management.

Python-Based Resume Content Analysis and Builder System | *Python*

Mar 2025 – Present

- Designed modular text-processing pipeline to parse and analyze unstructured resume content.
- Generated structured outputs from raw input with focus on logic validation and edge case handling.

ACHIEVEMENTS & CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900): Coursework and Certification Preparation

Poster Designer: Designed event materials for college events using Canva

Independent Work Ethic: Built and deployed multiple projects independently with a structured, accuracy-focused approach
